

The public are invited to the biennial Forder Lecture

**“Arithmetic
progressions of primes”**

With speaker Professor Ben
Green of the University of
Cambridge.

Professor Green will discuss
his 2004 result with
Terence Tao, where they
demonstrated that the
set of primes contains
arithmetic progressions
of arbitrary length.

**6.30pm
Monday 13
September
Maclaurin LT102,
Victoria University,
Kelburn Parade**
